

Advanced Wireless Jack Remote

Remote Control

Receiver

Product Overview Happijac's innovative **Wireless Remote** represents a new standard in "ease of use".

Unique coded addresses prevent inadvertent operation of any other remote systems. Won't run your neighbor's jacks.

Battery voltage sensing system prevents damage in low voltage conditions.

Accessory switch provides wireless remote operation of an additional device such as a room slide, door lock, etc.

Excellent operational range. No dead spots.

Can be operated either wireless or wired.

A lost or damaged remote can be easily replaced and programmed to communicate with the existing receiver.

Long battery life. Remote uses two common AA batteries

Automatic safety timeouts. 1 minute operational safety timeout. 2 minute standby shutoff.

Compatible with older Happijac systems. Just unplug the old wired remote receiver and plug in the new wireless. Makes upgrading to wireless fast and easy.
